Ref: New Server @ KMI Systems

Scott:

KMI would like to thank Excalibur Technology for the seamless integration of our new server. The switch-over caused very few interruptions or problems. I would like to thank Dan Funk for laying out the new system that will allow us to grow in the future.

Moreover, I appreciate the dedication and hard work that Justin Orseno provided us during the past week. His long hours and diligent work allowed for an easy transition.

I know as an owner you always hear the bad things. I just wanted to take the time and make sure the good news also makes it to you. As always, we appreciate the work your staff provides KMI.

Sincerely,

Kevin Coursin  
President
