

Where Homes Really Move

To whom it may concern.

Excalibur Technology has worked with our company for the past two years in IT. Excalibur has provided many computer services during our relationship, including server configuration, firewall installation for our internet connection, website development, and hosting of our company e-mail. In each case, Excalibur has demonstrated exceptional professionalism and knowledge in servicing our IT needs.

With respect to website development, Excalibur has worked with us for the past year and a half in developing mission-critical website applications. The applications that Excalibur has developed for us have become a cornerstone of our business model. With Excalibur's help we have been able to dramatically increase our capabilities and market share.

Excalibur has proven to be a valuable asset to our company. I would highly recommend them for any of your IT needs.

Best Regards,
