"To whom it may concern"

Gentlemen,

This is to confirm our long standing relationship with Excalibur Technology Corp., as our vendor for computer hardware, software, and internet applications such as web pages, freight tracking, etc.

We have found Excalibur Technology Corp. To be a very competent outfit that have kept us up and running with the latest technology, and very supportive through some of the inevitable "down times", always willing to be available with solutions, and support.

Needless to say, we think the world of their ability, and any company that selects Excalibur Technology Corp. For their online supply and support, will be in the best hands.

It is therefore without hesitation that we give Excalibur Technology our highest recommendation.

Sincerely,

Frank Hollesen
President
